---

## Education

### Bachelor of Medicine & Bachelor of Surgery, MBChB

University of Sheffield, 2017

### Bachelor of Medical Sciences, BMedSci (Hons)

University of Sheffield, 2014

---

## Experience

### National Health Service

2017 - Present

#### Doctor

Currently working as a foundation doctor in the National Health Service. Rotating through Haematology / Oncology, Respiratory Medicine, General Surgery, Accident & Emergency, Critical Care, General Practice.

### MedTech Sheffield

2016 - 2017

#### Co-Founder & Technical Lead

Formed an organization during university to promote the impact of technology in medical practice. We brought the ideas of our local community together by running a medical technology themed hackathon.

### Hack Partners

2016

#### User Experience Designer

Worked as the in-house designer for an accelerator programme in London. I worked with several startups to design user interfaces for various applications in the rail industry.

### AMEE Hacks

2014 - 2015

#### Lead Organiser

Organised the first European medical education hackathon as part of the AMEE (An International Association for Medical Education) 2015 conference. This was a 48-hour initiative to build relationships between medical professionals, designers, and engineers from around the world.

During the event, we reached over 550,000 people on social media, with over 2.7 million impressions.

### Health Education England, NHS

2014 - 2015

#### Advisory Team

Worked with the Technology Enhanced Learning department at the National Health Service (NHS) in the United Kingdom; focused on driving innovation across the healthcare education sector in the country; including the discussion of innovation hubs, conferences, and planning of hackathon events.

### Google

2014 - 2016

#### Student Ambassador

Partnering with the medical school and computing departments, I organised a series of start-up related events and an app development course. This enabled many students with no prior experience to develop their own Android apps and ultimately obtain an official Google course certification.

### Kairos Society

2016 - Present

#### Fellow

Invited to be part of the Kairos 2016 Fellowship for entrepreneurs under 25.

## Jeremy Chui

---

### Hive

2013 - 2014

#### Co-Founder, Lead Designer, & Interim CEO

Hive is a distraction-free, collaboration tool for small teams around the world. We built software aimed at improving productivity in the workspace.

Our team raised £30,000 on a valuation of £375,000 several months after launching the start-up, and went on to join an accelerator programme in the UK.

### UniReq

2012 - 2014

#### Founder & CEO

Designed and built an online resource offering detailed predictions for applications based on previous admission statistics; used by over 13,000 prospective university students.

### Yorkshire Ambulance Service

2016 - Present

#### Community First Responder

Volunteered as a community first responder and attended multiple emergency callouts during my final year of university.

### Sheffield Medical Society

2015 - 2017

#### Technology Officer

Worked as part of the medical society representing over 1000 students to discuss and advise the medical school on new technologies as methods for delivering education. In addition, I built an app to connect committee members together and synchronised the workflow between different teams.

### Sheffield Medical School

2015 - 2017

#### ICE Mentor

Organised tutorial sessions for junior medical students through a peer teaching scheme.

### SOAMS

2011 - 2014

#### E-Mentor (Sheffield Outreach & Access to Medicine Scheme)

Worked with high school students through an outreach programme; aiding them with their university applications and any academic and personal issues they faced.

---

## Awards
